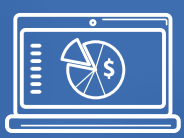
The Kingdom Trust Precious Metals Process*

** for direct investing of metals inside a retirement account*

1

The client (or his or her broker or dealer) submits the required **documents** to Kingdom Trust to process the precious metals investment.



2

Once paperwork is received, we contact the chosen depository to set up a sub-account. We also send client funds to the broker to make the **purchase**, at which point metals are keyed into our system as "pending."

3

After funds are received, the broker **ships** the metals to the depository. Delivery times depend on the broker, the depository and the mint from which the metals are shipped.

4

Once the depository receives the metals, it sends Kingdom Trust a report to update our client's account. The metals are moved out of "pending" and **confirmed** into the account.

KINGDOM TRUST®

As a passive, non-discretionary custodian, Kingdom Trust does not provide, promote, endorse or sell investment products and does not endorse or promote any individual investment advisor or investment sponsor.
